SUMMARY

AWS Cloud Engineer with 5+ years of experience supporting and optimizing large-scale systems on AWS, with additional exposure to GCP. Specialized in troubleshooting distributed services, automating operations with Python and Terraform, and improving reliability for mission-critical platforms. Proven success in high-impact roles at AWS and Github, with a strong focus on system uptime, observability, and customer success.

PROFESSIONAL EXPERIENCE

GitHub, Remote: SE III - GitHub Actions

Apr 2026 - Present

- Supported enterprise customers running large-scale CI/CD workloads on GitHub Actions and self-hosted runners.
- Troubleshoot complex workflow execution, reusable workflows, permissions, secrets management, and deployment pipeline issues.
- Partnered with Engineering and Product teams on escalations, incident investigations, and platform reliability improvements.
- Developed automation and diagnostic tooling to accelerate root cause analysis and improve operational efficiency.

Couchbase, Bangalore, India: TSE - 2, NoSQL

Mar 2025 - Mar 2026

- Investigated and resolved production issues across distributed Couchbase clusters, including XDCR lag, rebalance failures, and index build bottlenecks, ensuring high availability and uptime.
- Assisted with disaster recovery planning and failover configurations in hybrid cloud environments (AWS, GCP).
- Collaborated with internal engineering teams to surface critical bugs and improve product stability based on real-world failure cases.

Amazon Web Services, Remote, India: Cloud Engineer - Serverless

July 2021 - Aug 2024

- Provided expert support to over 300 top-tier AWS clients, specializing in services like Kinesis, Lambda, API Gateway (REST/HTTP), DynamoDB, Glue, Athena, and EKS, ensuring optimal performance and reliability.
- Served as POC for AWS Lambda and DynamoDB application issues, fixing 10+ critical bugs across various services and preventing escalations to service teams.
- Accredited as a Quality Champion and Mentor helping 10+ junior employees, maintaining high case quality standards and improving customer experience.
- Authored comprehensive internal and public-facing articles and documentation, enhancing team knowledge and deflecting over 1,500 recurring customer issues.

INTERNSHIP

Amazon Web Services, Remote, India: Cloud Associate - Intern

March 2021 - June 2021

- Designed and implemented scalable AWS CloudFormation templates using Python, automating the creation of over 100 troubleshooting scenarios (Bottlenose tool) and improving employee training efficiency by 40%.
- Created detailed documentation and best practices guides, increasing Bottlenose project adoption by 25% across teams.

TECHNICAL SKILLS

Cloud Platforms: AWS (Lambda, API Gateway, DynamoDB, EKS, EC2, S3, Step Functions, Glue, Athena), GCP

Containers & Infrastructure: Kubernetes, Docker, Terraform, ArgoCD, GitOps

Programming & Automation: Python, Java, Golang (basic), Linux/UNIX, Bash

CI/CD & Developer Platforms: GitHub Actions, Git, GitLab CI/CD, REST APIs

Databases & Data: SQL, DynamoDB, Couchbase, Kafka, ETL

Observability & Reliability: Datadog, Grafana, Splunk, Prometheus, PagerDuty, AWS CloudWatch, AWS X-Ray

Certifications: AWS SAA, AWS GenAI, AWS Well-Architected Proficient, Couchbase CAA, Couchbase Python Developer
